

SUSHIL CHHETRI

Android Developer

🌟 Intro:

Below are a few of my recent Android projects, showcasing my design and development skills.

* 🩺 Project: RoyMedical – Smart Medical Face Mask Ordering App

Description:

RoyMedical is a health-tech Android app that enables users to order **custom smart face masks** tailored for medical use. The app includes secure login, product selection with color and add-ons, prescription uploads, address input, and card payments.

🔍 Face Scanning with ML:

The app uses **Machine Learning** to scan the user's face and extract detailed 3D dimensions for perfect mask fitting.

📶 BLE Device Integration:

The smart masks connect via **Bluetooth Low Energy (BLE)** to monitor **SpO2, heart rate**, and other vital signs in real-time.

Role:

Sole developer – Built the entire app from scratch using modern Android development practices.

Tools & Technologies:

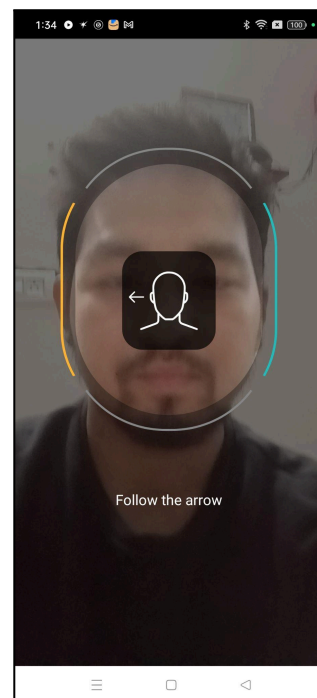

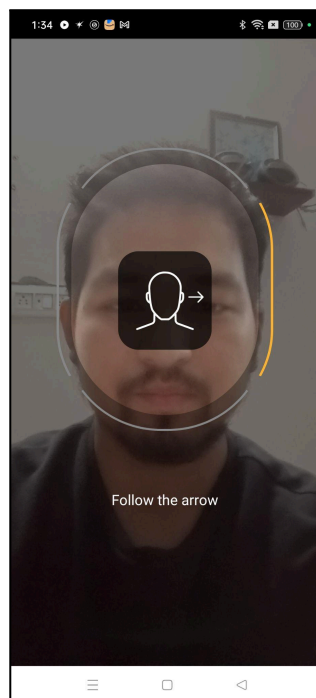

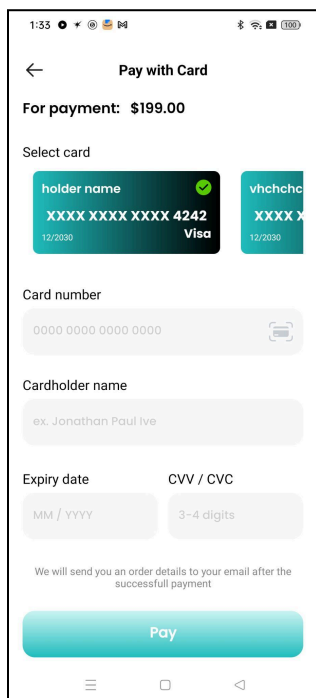

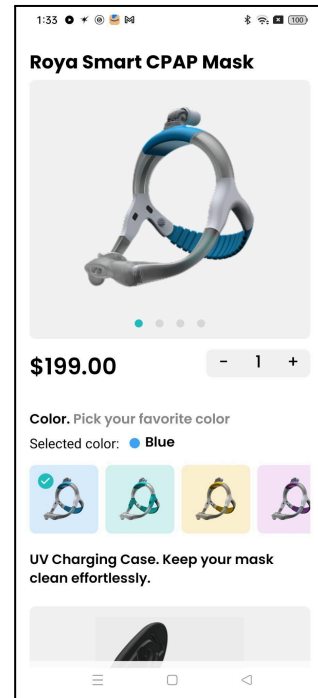

Kotlin, MVVM Architecture, Hilt (Dagger), Retrofit, RxJava, Firebase Auth, Firestore, ViewBinding, Custom Views, BLE API, ML Kit, Stripe SDK

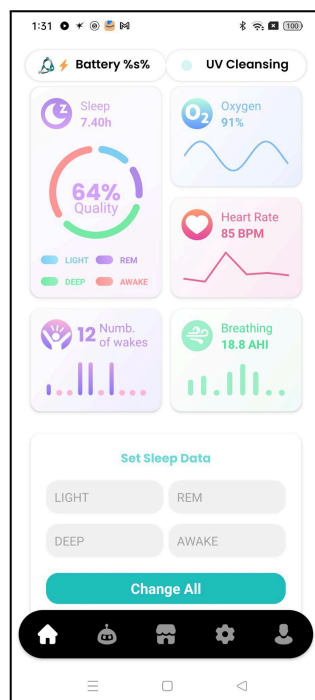

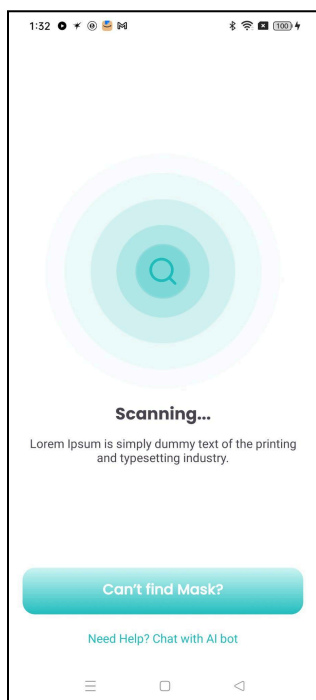

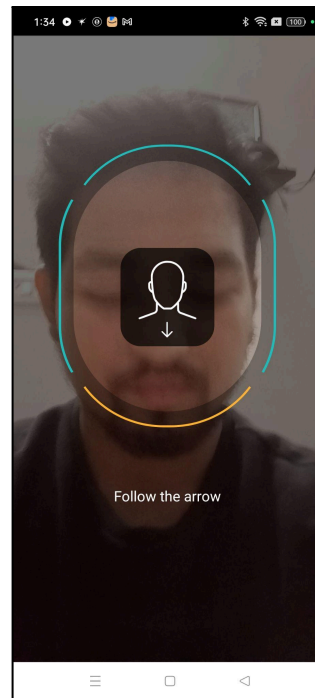

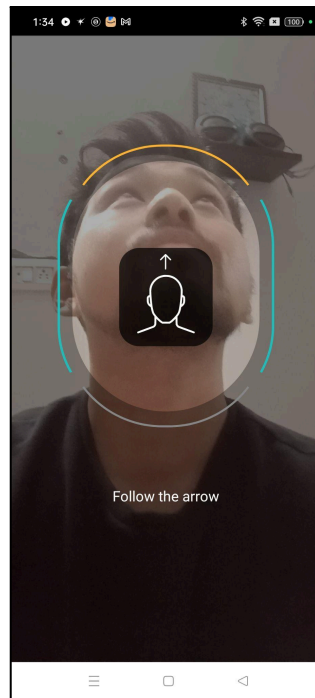

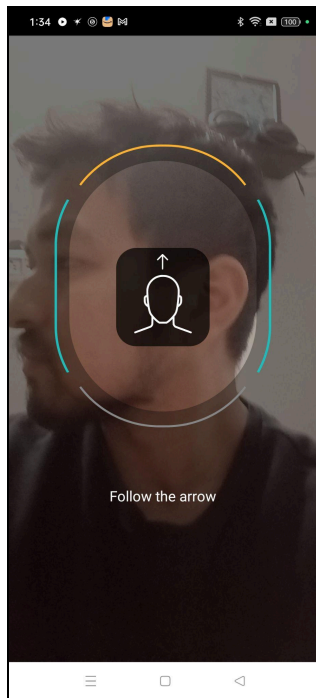

Skills Applied:

- Machine Learning-based facial scanning
- BLE communication for real-time sensor data
- Clean MVVM structure with ViewBinding
- Secure login, order placement, and payment
- Custom UI components for product configuration

- RESTful API integration with Retrofit & RxJava

* 🌟 Project: Temple Bliss – Live Psychic Reading Platform

Description:

Temple Bliss is a live psychic reading app where users connect with real, vetted psychics via **chat, audio, or video calls**. The platform offers various psychic categories including astrology, tarot, and dream analysis. Users can explore profiles, select services, make in-app payments, and review sessions. Psychics can manage profiles, pricing, and session history seamlessly.

✅ **Key Feature:** Integrated **Twilio SDK** for managing real-time **chat, voice, and video sessions** between users and psychics.

🔵 Robust **session & notification management** system built using **WorkManager** and **RxJava** for a smooth user experience.

Role:

Sole Developer – Full app architecture, Twilio integration, session & call management

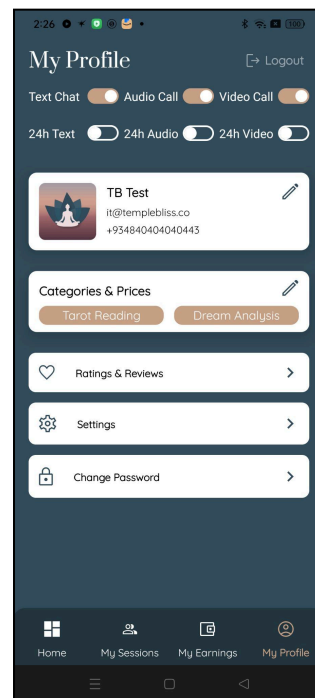

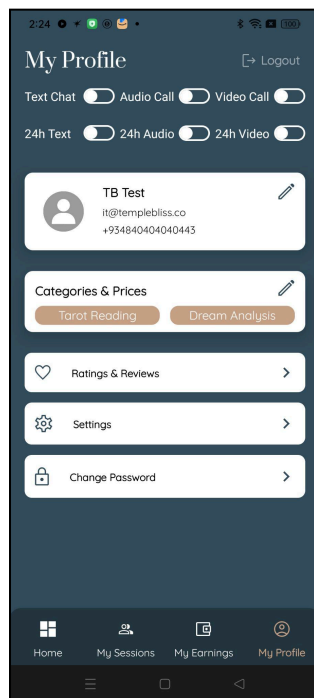

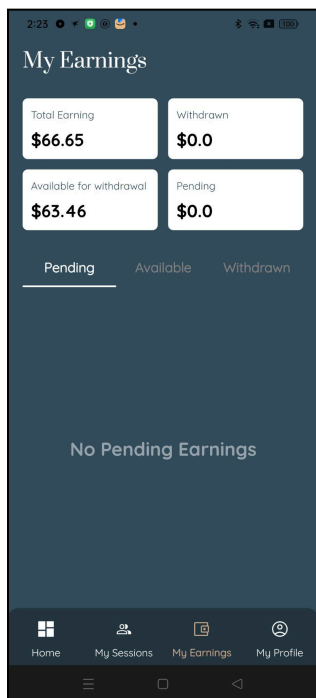

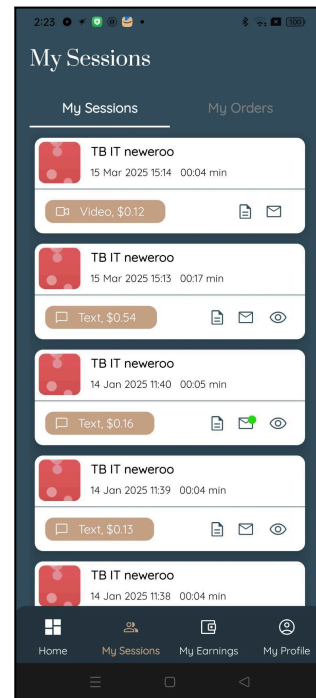

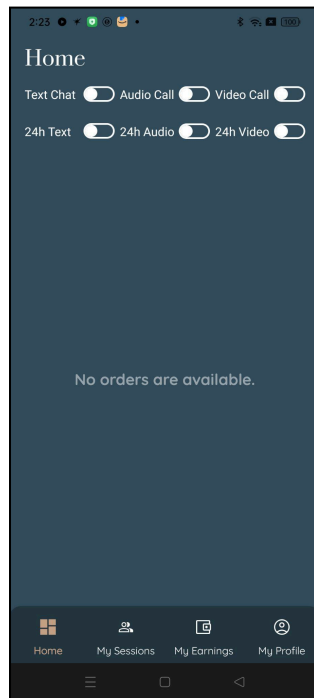

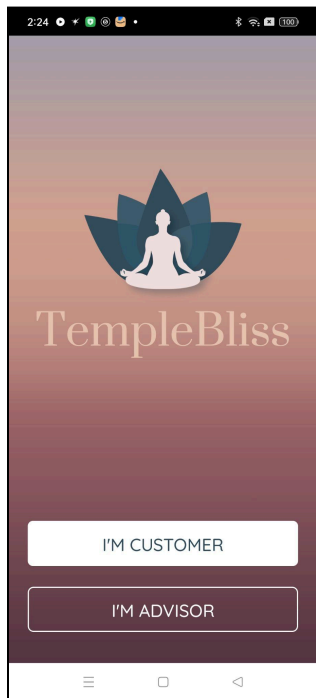

Tools & Technologies:

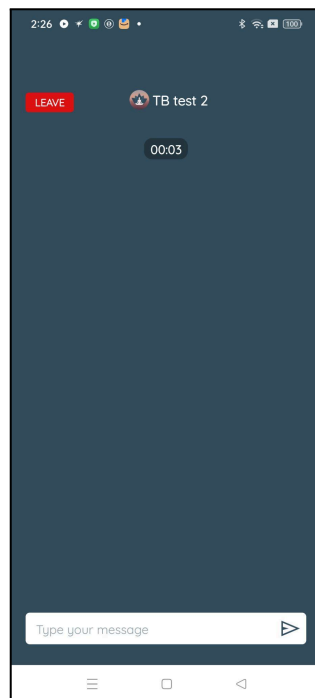

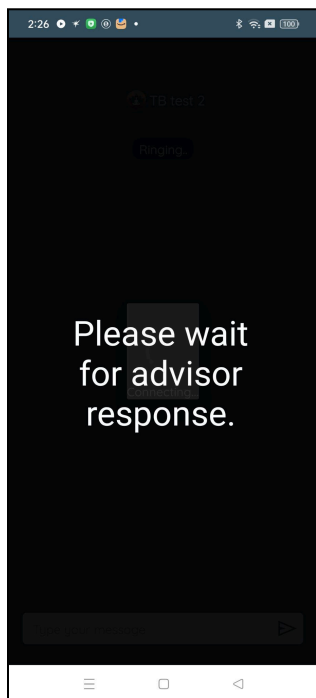

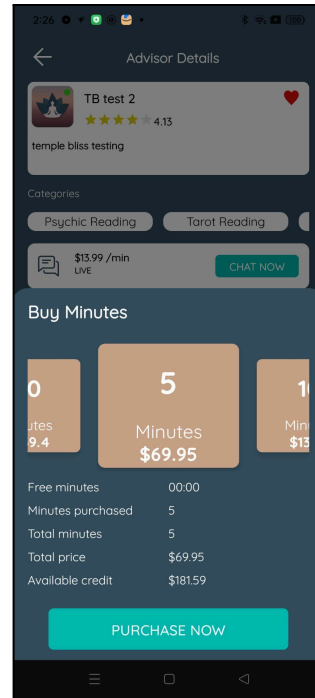

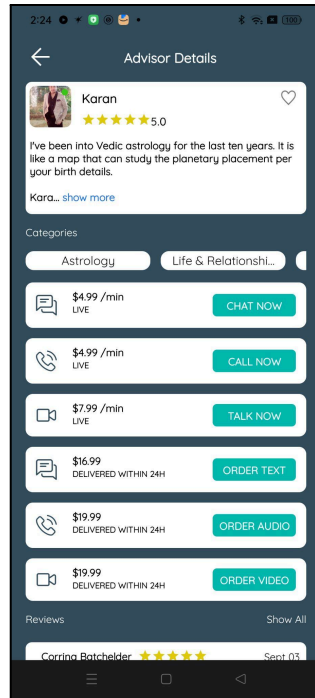

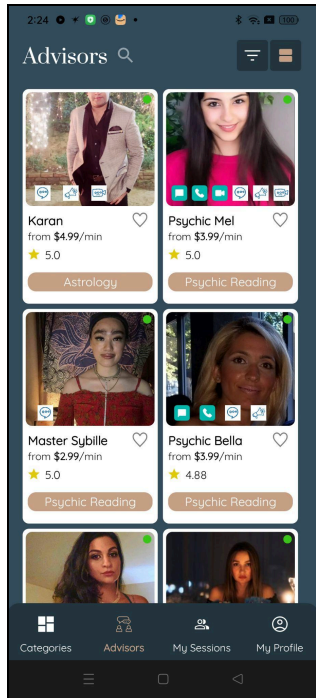

Kotlin, MVVM, Hilt (Dagger), Retrofit, Twilio SDK (Chat/Video/Voice), WorkManager, RxJava, Firebase, Notification API

Skills Applied:

- Real-time chat, audio & video session integration with Twilio
- Profile and service management system
- In-app secure payments and session booking
- Session history, reviews, and feedback management
- Clean architecture with dependency injection (Hilt) and background task handling

Let's Work Together

With 4+ years of experience in Android development and a strong command over modern tools and technologies, I'm passionate about building scalable, high-performance apps that deliver real value to users.

If you're looking for someone who can take your mobile app idea from concept to launch with clean architecture, beautiful UI, and robust functionality — let's connect!

 **Feel free to reach out. I'd love to discuss how I can help with your project.**
